On or about July 2011 one morning the RCZ would not start and gave a warning signal that there was a problem with the water coolant level and then registered an engine fault which needed repair. Mon, 05 Nov 2018 12:06:00 GMT Peugeot Car - worst car ever, Review 624114 | Complaints Board - I collected my car yesterday,

and based on the report from the ECU, the issue is estimated as a turbo regulation valve that was potentially jammed open, and that was a temporary fault, but the permanent fault was low pressure from the turbo.
