Tue, 06 Nov 2018 10:39:00 GMT G and M Programming for CNC Milling Machines - ULisboa - In a previous life we got bit big time by programming using centre of table as datum. The machine had a knock which moved it so the table didn't

rotate about the centre any more. The table went 90, but it shifted in the other axis too, so all datums were out! Program each face. Its the safest thing to do.
